About JOIN

**Join is the only Italian-owned company in the conferencing market.
We have been in the Italian market for 15 years
and our staff has a proven experience in conferencing of more than 20 years.
We are a worldwide Conferencing Service Provider for
professional audio, video and web communication services:
conference call, video conferencing, web conferencing and streaming.**

JOIN Offer

**Join is the first Italian conferencing provider offering
a complete range of communication services:**

JOIN AUDIO

A professional audio conference service that allows you to access meetings from any country in the world, using toll and toll-free access numbers or the appropriate app. The service offers management of reports, registrations and Q&A sessions. It is also possible to manage the conference online thanks to the dedicated web interface.

JOIN EVENT

An operator-assisted audio conference service based on Arkadin technology. Dedicated to major audio events such as quarterly financial statements, annual announcements, the service offers high professionalism and unparalleled audio quality.

JOIN VIDEO

An innovative HD video conferencing service in the cloud on Vidyo technology that will amaze you with high definition quality, clear audio and ease of use from any terminal: personal computer, laptop, tablet, smartphone, videoconference endpoint. and SIP.

JOIN VISION

A H .323 multi-videoconference service based on Arkadin Cloud technology. It is aimed at companies that use standard H .323 / SIP endpoints but do not intend to purchase complex and expensive multi-videoconferencing infrastructures, nor acquire personnel dedicated to organizing and managing meetings.

JOIN WEB

A full-featured videoconferencing service based on the Zoom platform. Accessible from your PC, Mac, tablet and smartphone. IP and audio access. Statistics, HD audio, full HD video, recording, chat, screen sharing, and any other features a videoconferencing service can offer today.

JOIN CAST

This service is based on 24 technology and offers the widest variety of tools for broadcasting events and content on the web. It is the most innovative and complete service available to reach the largest possible audience.

JOIN STREAMING

A service based on Livestream technology; it is the easiest service for audio / video webcast at the most affordable price. It allows you to reach a wide audience with video and slide presentation without any technical installation or special requirements.

JOIN CONNECT

An audio, video, instant messaging, file sharing service that allows customers and suppliers to get in touch with you in an innovative way through your website, an App from a smartphone or a PC browser.
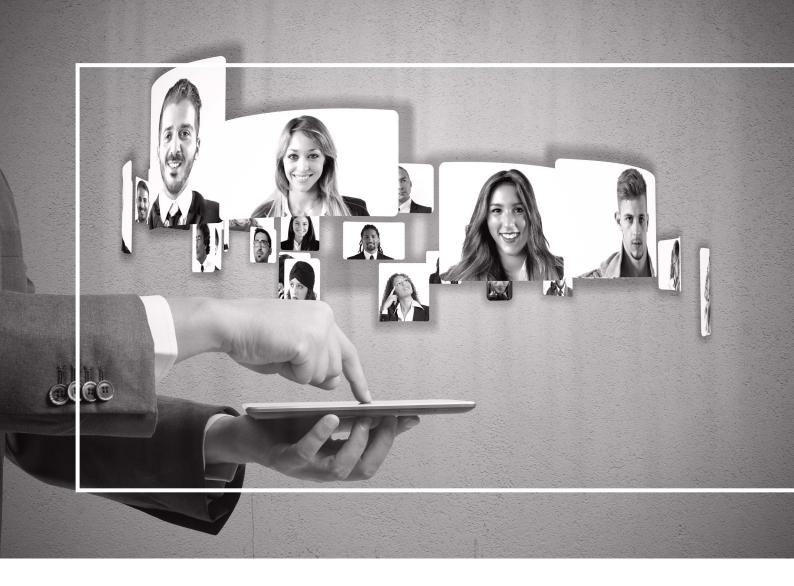

JOIN PHONE

A new solution aimed at small and medium-sized companies that need an advanced telephone switchboard, taking advantage of high-tech services, reducing telephone costs.

JOIN INTERPRETER

Thanks to this innovative service it is possible to instantly break down the geographical and linguistic barriers that can hinder business development, especially with emerging countries with a stronger economic growth rate

JOIN TEAM

A Unified Communication service that exploits the potential of the Slack engine to offer audio, video, chat, file sharing, presence, calendar, to do services in addition to connecting to over 300 apps.

ENGAGE ON YOUR AUDIENCE'S TERMS

Open your eyes to the impact of interactive, data-rich webinars from ON24.

Live Webinars
Hold live, online webinars to engage your audience in real-time and get instant analytics on that behavior. Get live feedback to adjust your content dynamically and encourage audience participation. Safeguard against webinar fails with the greatest reliability, security and attendee capacity in the industry.

Simulive Webinars
Give your audience all the excitement of a live event, while reducing your own anxiety with simulive webinars. Record your webinars in one or multiple takes to put presenters at ease and even edit together multiple presentations. Then, engage with your audience in real-time during the pre-recorded presentation and roll-over to live mode after for further interaction and live engagement.

On-Demand Webinars
Automatically convert your live webinars into an on-demand webinar, or produce a webinar as an on-demand presentation that can be chapterized or translated into 35 languages. Sustain interactivity and set alerts to follow up on any questions asked while watching on demand. Continue to gather engagement analytics to maximize results.

OVER 20 WEBINAR INTERACTIVITY TOOLS

Q&A
Allow your audience to submit questions whenever they want and your presenters (or supporting staff) to answer them during a live broadcast. For on-demand webinars, you can configure the Q&A widget to email questions to supporting staff members.

Speaker Bio
Introduce your presenter with their name, photo, title, company and a brief biography. The Speaker Bio widget allows rich text formatting, including different font styles and sizes, bullets and hyperlinks.

Twitter
The Twitter widget allows your attendees to view multiple feeds from within your webinars and share information with their followers.

Idea
Designed for webinars that require brainstorming, feedback or focus-group functionality, the Idea widget allows you to pose a question or topic to your audience.

Group Chat
The group chat widget lets audience members communicate directly with one another in a text module display. During a live webinar, presenters and moderators can facilitate the discussion through the presenter interface.

Polls
Pose questions to your webinar audience within your slide presentation, get the results in real-time and share the poll results with webcast attendees.

Survey
The survey widget allows you to ask multiple choice, true/false and open-ended questions, which attendees can reply to directly from within the webinar.

Test
The test widget gives you the ability to quiz webinar attendees by creating questions that have specific answers. You can define how many correct answers they need to earn a passing grade, as well as how many times they can retake the quiz.

DESIGN AND BRAND YOUR WEBINAR

A great webinar design draws your audience in and brings your brand to life. See how our customers are creating amazing digital experiences through their webinars.

Corporate Branding Identity

Whether it's using your corporate colors, icons or photos, bringing key elements of your creative identity into your webcasting console creates a unified brand experience that helps differentiate your webinar from the competition.

Slides Match Console Designs

By matching your console design to your presentation slides, impress your audience with a continuous branding experience. This adds to the visual impact of your webinar and immerses attendees in your brand. BrightEdge, a marketing technology company with a winning SEO platform, delights with a coordinated look.

Topic-Specific Custom Console

Reinforce the topic of your webinar by using a related image. This provides a visual reminder of your webinar's theme to help the audience stay focused on the content while engaging with your webinar. QASymphony, a software testing platform for DevOps, creatively encourages a forum for live Q&A.

Creative Widget Utilization

Select the right engagement tools for your audience and objective to boost interactivity and allow attendees to customize their own experience. You can design the look of your own widgets with custom colors, shapes and designs.

Presentation tools built for webinar presenters

Our easy-to-use graphical interface removes the most common frustrations that come with delivering a webinar, so presenters can focus on what they do best: presenting. According to our customers, setting up and running a webinar is the easiest thing you'll do.

Personalized screen views

We reinvented the user interface with movable, resizable windows. Now your presenters can take full advantage of the whole screen area and view the slides and other elements at any size they want.

Customizable interface

Give your presenters everything they need to set up their ideal workspace and tweak it over the course of the presentation to make real-time adjustments and meet their unique needs.

Interactive storyboard

This unique interactive tool puts more control in the hands of your presenters, giving them the power to be agile and adapt their delivery to the audience's needs.

### Multi-presenter architecture

Sophisticated multi-presenter architecture uses an auto-refresh engine and live chat to keep multiple presenters in sync throughout the presentation.

Role-based access

Restrict functionality with role-based access, so everyone can get to the tools they need, and no one needs to worry about unnecessary features.

Enhanced Q&A

Live Q&A is one of the best ways to connect with your webinar audience. A presentation manager makes it easy to sort questions into folders, prioritize them for follow-up and flag them as answered or unanswered.
